Magnet-Retained Implant-Supported Overdentures: Review and ...

Sun, 16 Sep 2018 15:00:00 GMT Introduction. Magnets made from aluminum–nickel–cobalt (AlNiCo) alloys have been used in dentistry for many years. 1 Initially, the repellent force of like magnetic poles was harnessed from open-field AlNiCo alloys embedded in the base of upper and lower dentures, so that the repellent forces would keep dentures on the residual ridges. However, this approach achieved little popularity ...

Hypothesis Journal » Reducing mercury release from dental ...

Tue, 18 Sep 2018 20:05:00 GMT Abstract Currently, the most common types of materials used for dental restorations are silver amalgam and composite resins. Unfortunately, both have disadvantages.
