Industrial furnace - Wikipedia

Fri, 14 Sep 2018 17:33:00 GMT *The purpose of an industrial furnace is to attain a higher processing temperature in comparison to open-air systems, as well as the efficiency gains of a closed system. Industrial furnaces typically deal with temperatures higher than 400 degrees Celsius. An industrial furnace is an equipment used to provide heat for a process or can serve as reactor which provides heats of reaction.*
