Wed, 11 Dec 2013 23:59:00 GMT Background. Optimal management of post-operative wounds in the community is important to prevent potential complications such as surgical-site infections and wound dehiscence from developing.

IOSR

Abstract: Direct inguinal hernias are less likely to present as incarceration or strangulation as compared to indirect inguinal hernia, because they have wide neck. We present a case of an 80-year-old male presented with irreducible and painful swelling over the right inguinal region and features of intestinal obstruction.
