#### **Low back pain - Wikipedia**

Mon, 17 Sep 2018 04:57:00 GMT Low back pain (LBP) is a common disorder involving the muscles, nerves, and bones of the back. Pain can vary from a dull constant ache to a sudden sharp feeling. Low back pain may be classified by duration as acute (pain lasting less than 6 weeks), sub-chronic (6 to 12 weeks), or chronic (more than 12 weeks). The condition may be further classified by the underlying cause as either mechanical ...

#### **Multistate Outbreak of Fungal Meningitis and Other ...**

Thu, 29 Oct 2015 23:53:00 GMT October 30, 2015 further updates to the case counts are not anticipated at this time. On October 30, 2015, CDC updated its web resources for patients and clinicians. Patients affected by tainted steroid injections from the New England Compounding Center continue to receive treatment for their infections and clinicians should continue to monitor patient recovery.

#### **UpToDate**

INTRODUCTION. It is estimated that up to 84 percent of adults have low back pain at some time in their lives []. The vast majority of patients seen in primary care (>85 percent) will have nonspecific low back pain, meaning that the patient has back pain in the absence of a specific underlying condition that can be reliably identified []. For most of these individuals, episodes of back pain are ...

Thu, 17 Mar 2016 23:59:00 GMT This report from CDC's Morbidity and Mortality Weekly Report (MMWR) provides

*recommendations for primary care clinicians who are prescribing opioids for chronic pain outside of active cancer treatment, palliative care, and end-of-life care.*

#### **Prevention and treatment of low back pain: evidence ...**

*Sun, 16 Sep 2018 17:02:00 GMT Many clinical practice guidelines recommend similar approaches for the assessment and management of low back pain. Recommendations include use of a biopsychosocial framework to guide management with initial non-pharmacological treatment, including education that supports self-management and resumption of normal activities and exercise, and psychological programmes for those with persistent ...*

#### **Lexipedia - Where words have meaning**

*Tue, 18 Sep 2018 20:13:00 GMT Back pain is pain felt in the back. It is divided into neck pain (cervical), middle back pain (thoracic), lower back pain (lumbar) or coccydynia (tailbone or sacral pain) based on the segment affected. [1] The lumbar area is the most common area for pain, as it supports most of the weight in the upper body. [2] Episodes of back pain may be acute, sub-acute, or chronic depending on the duration.*
